RENT ON KENT

1 84 Kent is a new luxury rental now leasing 340 spacious loft apartments on the Williamsburg waterfront. The property features amenities that surpass those found at any other rental in Brooklyn. 184 Kent also offers striking views of the East River, the Williamsburg Bridge and the Manhattan skyline. Select apartments look upon a massive, fully landscaped interior courtyard that's been created in this historic building that was originally designed by famed architect Cass Gilbert.

184 Kent's apartments have a level of finish typically reserved for luxury condominiums. Each unit has teak floors and is equipped with natural stone countertops, custom cabinetry and stainless steel appliances.

"From the start, our vision has been to preserve and enhance the integrity of this iconic building while introducing modern elements and conveniences to create a one-of-a-kind residential experience," said Jason Halpern, managing partner of JMH Development, which owns the property and led its transformation.
